4

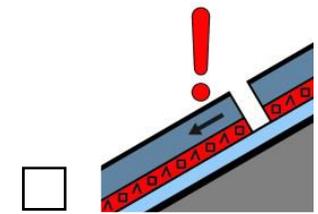

1. Quelle(s) situation(s) avalancheuse(s) ?

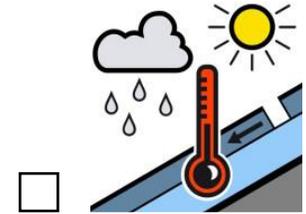

Neige fraîche

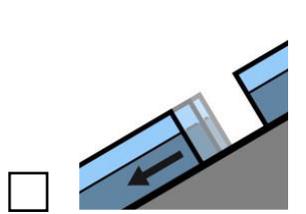

Neige ventée

Sous-couches fragiles persistantes

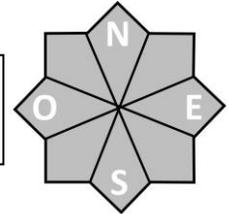

Neige humide

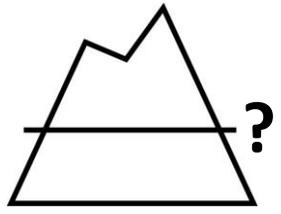

Avalanche de glissement

2. Localisation ?

Orientation critique

Altitude critique

Zones critiques spécifiques

Près des crêtes / cols

Même loin des reliefs

Pentes ombragées

Pentes ensoleillées

3. Observable(s) ?

Quantité de neige fraîche

24h
48h

Activité avalancheuse récente

Autres observables
